

Honeyville®

THE WAY
we see it

The Story of Honeyville

Doing business the way it should be. That's the essence of the Honeyville Way.

Rising to the challenge of consistently prioritizing our customers is a responsibility only a select few can manage. At Honeyville, it's a given.

Our founder Lowell Sherratt Sr. understood that taking care of people was paramount, a principle he lived by without compromise. During World War II, he uprooted his life as a citrus salesman and moved his wife and three children from California to Utah to help Japanese American families seek safety and move inland from the internment camps on the West coast. It's here he would purchase a mill to crack grain for a feed company and build the Honeyville legacy.

Decades later, Honeyville remains steadfast in upholding this selfless philosophy.

We've earned a reputation as a leading food manufacturer and ingredient distributor by consistently operating at an extraordinary level. Combining our expansive line of products and services with an unwavering commitment to excellence, we ensure that every task is executed with precision. And we do it with enthusiasm, finding fulfillment by elevating our customers to new heights.

At Honeyville, "we're here to help," isn't just a slogan, it's the guiding principle we live by every day. Going above and beyond to defy expectations is our goal. Dependability is our standard. And delivering quality products is our top priority.

When faced with challenges, we roll up our sleeves and get to work. Because our willingness to serve and our idealistic spirit is what fuels the creative solutions and innovation that continually amaze.

Specialty Grain Milling

For decades our whole-grain mill located in Honeyville, UT has been servicing the food industry with pride and passion for our work. Our company philosophy took root in a picturesque valley in northern Utah. Every milling technology and service we offer originated with a customer who had a specific need. Our ability to be flexible and provide specialty grains has proven to be a value-added solution to our customers.

Our diversification allows us to offer:

- Whole grains
- (RTE) Flaked grains
- Cracked grains
- Multi-grain mixes
- Whole-grain flours
- Pearled & hulled grains
- Soy meal processing

"The Honeyville team exhibits the highest level of service and professionalism throughout their organization. They are industry leaders across many product categories with exceptional customer service and consistent high-quality ingredients."

HEAT TREATMENT

Honeyville's TempSURE® Heat Treatment system is a proprietary process that uses closely monitored heat to act as a kill step to reduce or eliminate the level of bacteria for products that carry high levels of pathogens. Our all-natural process is a micro-reduction system that mitigates food safety risks.

Why choose TempSURE® ? HEAT TREATMENT

- Certified to handle Organic Products
- Product remains in its original packaging*
- Ideal for Ready-to-Eat (RTE) ingredients
- Tolling Services available

"Honeyville's TempSURE heat-treatment process is helping our consumers stay healthy and safe from the risk of high-micro products. I highly recommend this method to any producer searching for a way to reduce unsafe levels of bacteria in dry food ingredients."

- Honeyville TempSURE Customer
